POLUNIVERSE

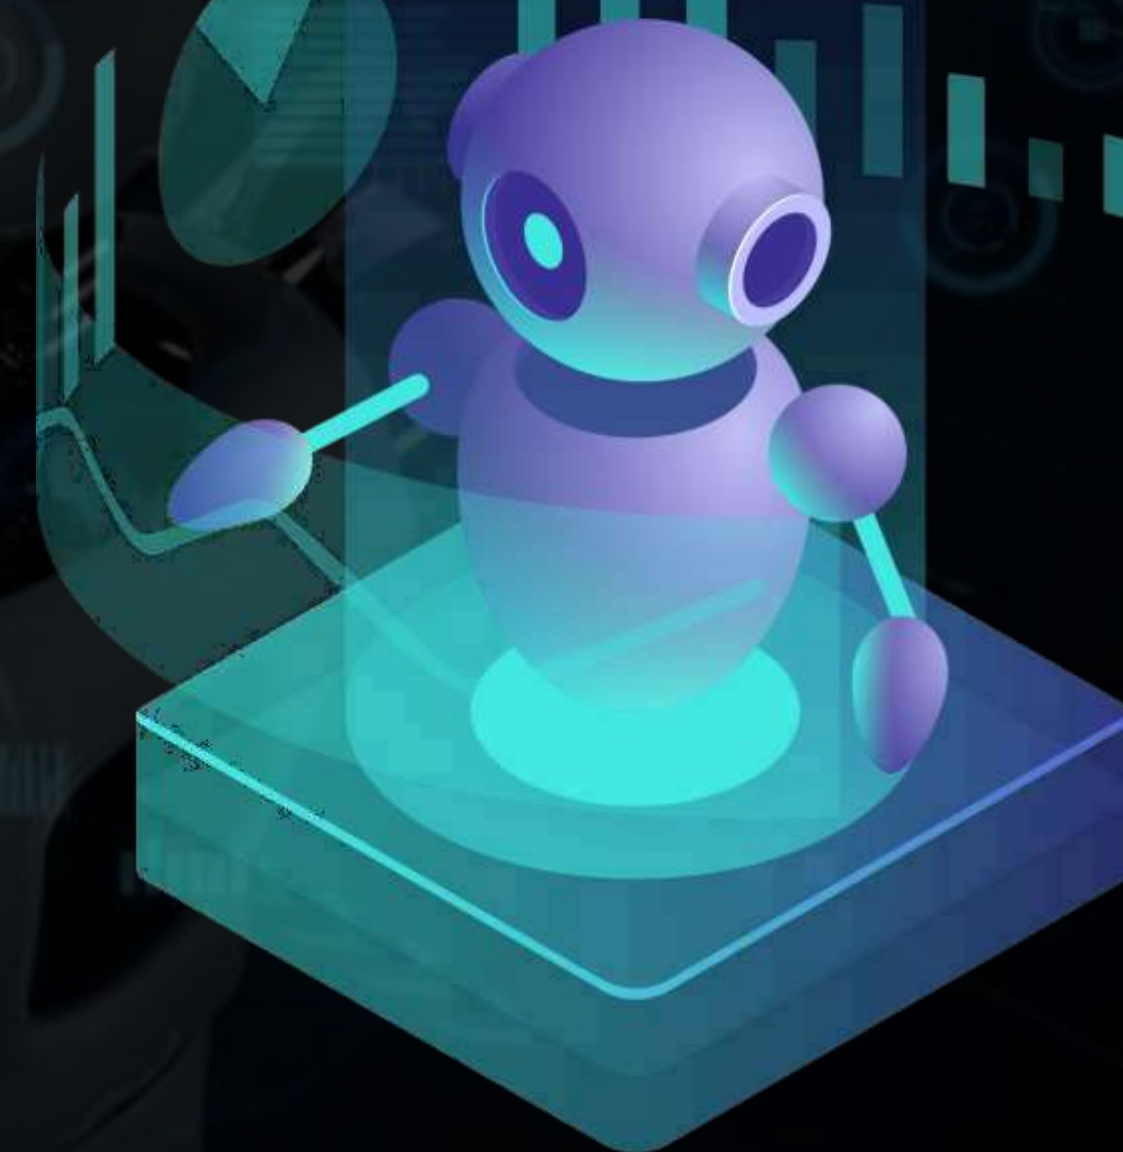

POLUNIVERSE

**POLUNIVERSE** is a community based decentralized *Smart Contract*, built on the Polygon Block-Chain.

A payment gateway that facilitates peer-to-peer. ***instant commission payments*** between its participants

# ***What Is A Smart Contract ?***

A smart contract is a self-executing digital agreement written in code, stored and run on a blockchain. It automatically enforces and executes the terms of the contract when predefined conditions are met, without the need for intermediaries.

These contracts run on blockchain networks (like Ethereum, Binance Smart Chain, Solana, etc.) and are triggered automatically when predefined conditions are met.
